

## **FULL STACK SOFTWARE DEVELOPER**

**Sqilline** is a software company that expertise in **Healthcare Big Data Technology, Machine Learning Algorithms and AI.**

We have developed an **Analytics Healthcare Platform for Real-World Data.**

**Danny Platform** can evaluate massive amounts of real-world data from multiple sources (EHRs, registries, labs, etc.) in the oncology, cardiology, ophthalmology, rare diseases and other fields. The software provides comprehensive searches, in-depth analyses, predictions and treatment solutions to physicians, researchers and payers.

Sqilline's data analytics capabilities enable hospitals, pharmaceutical companies and reimbursement agencies to gain insight into real-world evidence of patient care, particularly in this era of value-based care.

We are a leading company in the areas of Precision Medicine, Life Science and Healthcare.

The company is looking for a candidate to fill up the **Full Stack Software Developer position in Sofia.**

The Full Stack Software Developer will be responsible for designing and implementing secure and efficient software solutions and collaborating with cross-functional teams to define, design, and ship new features as well as participating in code and design reviews, developing and maintaining technical documentation, and troubleshooting and debugging applications.

As a member of our company, you will be part of a small, agile and innovation-driven team, working with innovative healthcare technologies.
